THE RSF BUILT-IN ADVANTAGE

Benefits of a wood stove and the beauty of a fireplace

Focus SBR

Heating with wood has many benefits:

- Unique, cozy warmth unlike any other heat source
- Self-reliance during emergencies and outages
- Renewable, clean, and economical fuel source
- Promotes self-sufficiency and drives local economy

The RSF Built-in Advantage offers all the benefits of heating with wood, plus:

The beauty of a built-in fireplace

- The perfect place for family photos and seasonal decorations
- Increases the value of your home

Radiant AND convective heat

- Radiant heat is the warm glowing heat that radiates from warm objects like the sun. It warms the soul as much as your body and home.
- Convective heat is warm air that can be shared throughout the home. An RSF fireplace lets you heat up to 3,000 ft², but keeps you comfortable by spreading it out.

Safe, zero clearance installation

- Set the fireplace on a wood floor and push it up against drywall safely
- Perfect for new construction and renovations

THE RSF COMFORT ADVANTAGE

Feeling a chill? Feeling too warm?
Customize the heat distribution in your home.

An RSF fireplace can duct heat to the room of your choosing, including the basement or away from the room with the fireplace itself.

The RSF Comfort Advantage allows you to:

- Heat up to 3,000 square feet
- Use ductwork and fans to move heat to other rooms
- Heat the basement from the living room
- Use a thermostat to automatically move heat away when it gets **too hot**
