Effective July 1st, 2021 we are implementing a net surcharge on all RSF and Renaissance Fireplaces. This surcharge applies to fireplace units, only.

The price of steel and other raw materials has increased significantly in recent months. Some of these increased costs must be passed along, and we apologize to customers that have placed orders and will not receive their fireplace before the surcharge takes effect. When the cost of raw material levels off, we will have a better idea of our true costs and the surcharge will be lifted. At this time, we do not know when that will be.

To minimize the impact of these increased costs on pricing, this is a net surcharge. That means it is the same cost at every level. Whether you are a distributor, retailer, or consumer, the surcharge is the same amount. Therefore, every dollar of this surcharge goes directly to paying increased material costs. Consider a 600 lb fireplace, most of which is steel, when steel prices are more than double what they were 6 months ago.

See below for a list of all fireplace models and their corresponding surcharge:
