

EXCELPellet

SETTING THE STANDARD FOR THE PELLETT CHIMNEY INDUSTRY

EXCELPellet has revolutionized the pellet chimney industry. It was the first pellet vent to include a silicone gasket seal on every part. It's not surprising EXCELPellet has spawned a league of impersonators. Today, nearly all pellet chimneys use a silicone gasket seal, but none have the innovative components or quality fit and finish of the original, EXCELPellet.

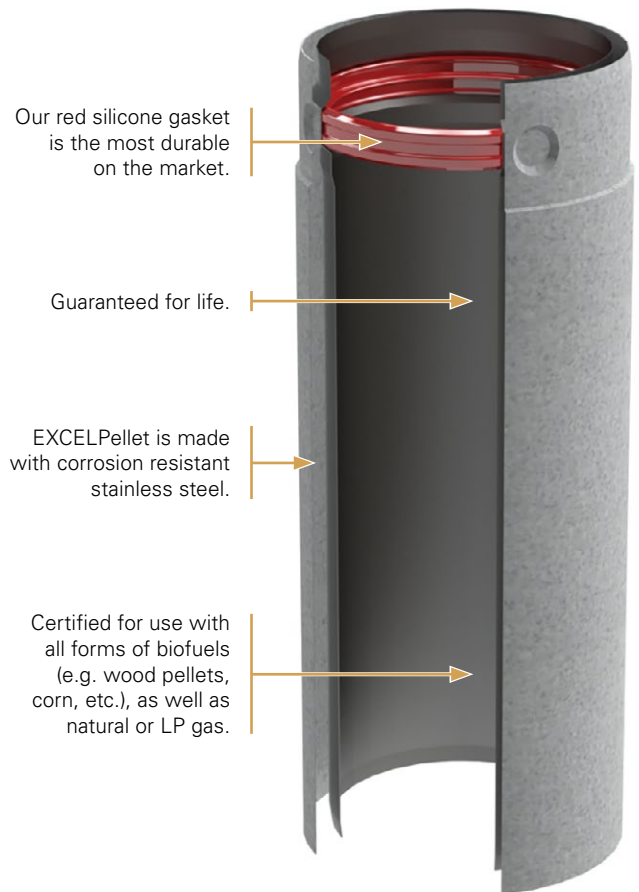

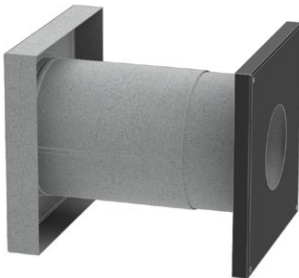

Keep your chimney clean

EXCELPellet is easier and faster to clean than any other brand. Our unique clean out parts will save time, money, and headaches.

Keep your home warm

Save money on your heating bills by keeping cold air out and the heat from your stove in. EXCELPellet is the only pellet vent with insulated wall thimbles to help make sure your home is getting the most out of your stove.

Our red silicone gasket is the most durable on the market.

Guaranteed for life.

EXCELPellet is made with corrosion resistant stainless steel.

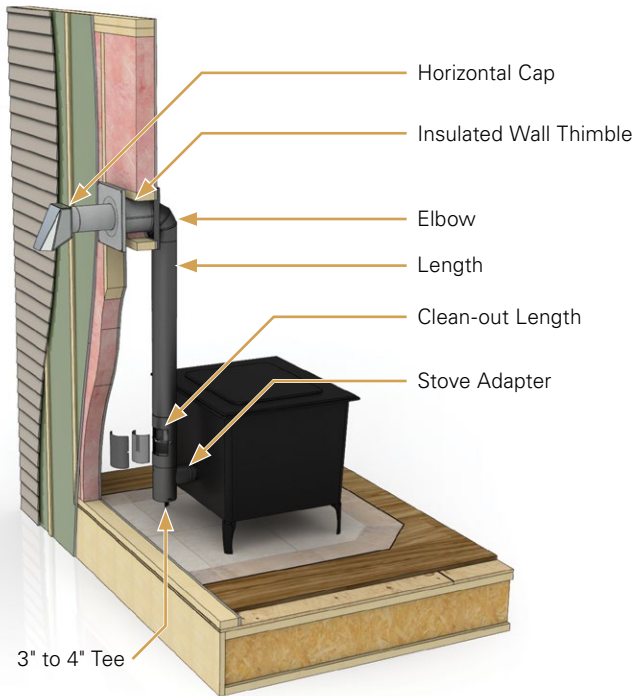

Certified for use with all forms of biofuels (e.g. wood pellets, corn, etc.), as well as natural or LP gas.

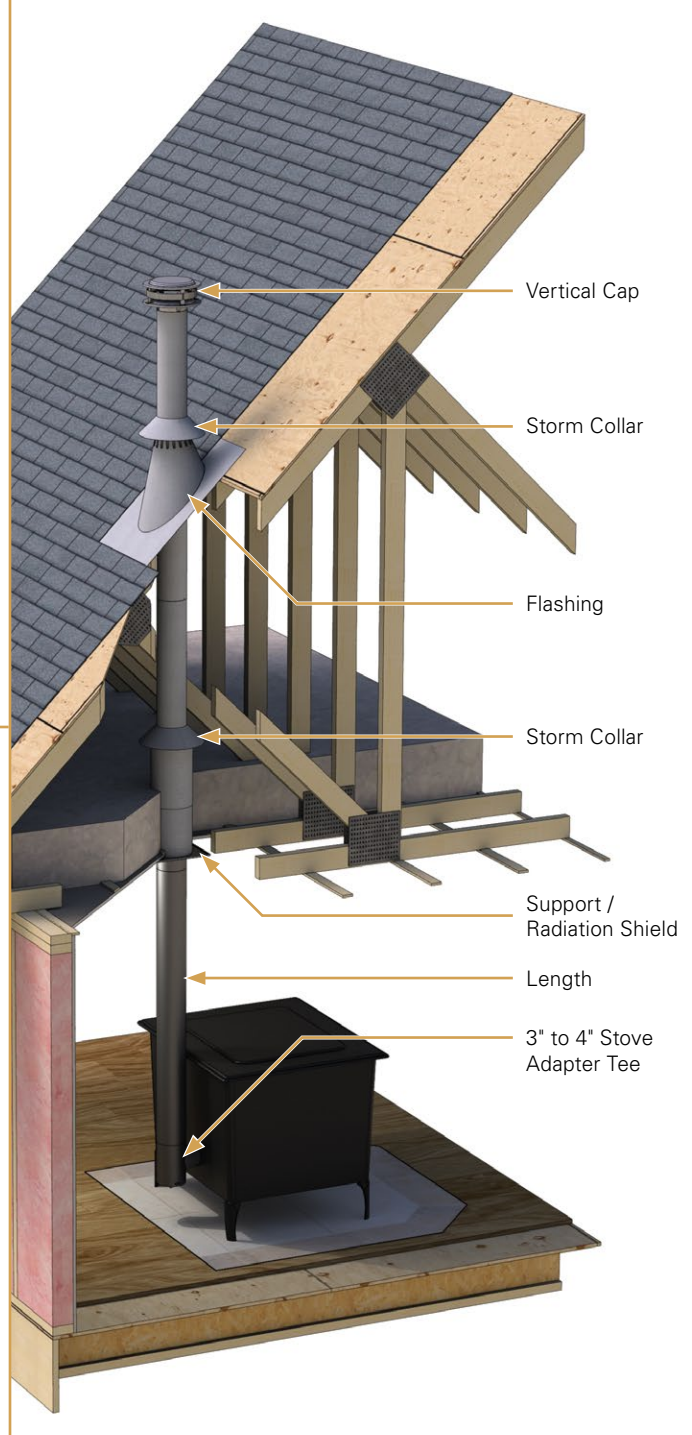

Planning your installations

Examples of standard pellet chimney installations

UP AND OUT installation with a clean-out length and horizontal termination

VERTICAL installation with vertical cap

OUT AND UP installation with clean-out tee and jet cap
